

Project Design Phase
Proposed Solution Template

Date	6 JULY 2026
Team ID	
Project Name	BookStore
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many students and readers find it difficult to discover, organize, and purchase books from a single platform. Traditional bookstores have limited availability, lack personalized browsing, and make it difficult to manage orders efficiently.
2.	Idea / Solution description	Readora Bookstore is a MERN Stack-based online bookstore that allows users to browse books by category, search for books, register/login, add books to their cart, place orders, and view order history. It also provides an admin dashboard for managing books, orders, users, and sales statistics.
3.	Novelty / Uniqueness	The system offers a modern, responsive online bookstore with secure JWT authentication, category-wise browsing, shopping cart functionality, online order management, admin book management, and a user-friendly interface built using React and TypeScript.
4.	Social Impact / Customer Satisfaction	Readora makes books easily accessible to students and readers anytime and anywhere. It simplifies book purchasing, reduces the time spent searching for books, provides a smooth shopping experience, and improves customer satisfaction through an easy-to-use interface
5.	Business Model (Revenue Model)	The platform can generate revenue through online book sales, featured book promotions, premium seller listings, publisher partnerships, advertisements, seasonal offers, and future subscription-based membership services.
6.	Scalability of the Solution	The application is designed using the MERN Stack with a scalable architecture. It can support thousands of users, a large collection of books, secure online transactions, cloud deployment, analytics dashboards, recommendation systems, and future AI-powered book recommendations.
